

Your energy use at a glance

Use this report to learn about your energy use and how you can save more.

How you compare to others

Efficient homes represent the 20% of similar homes in your comparison group that used the least energy this period.

A unit is a combined measurement of electricity (kWh) and natural gas (therms) use.

What could have caused your energy use to increase?

Changes in your household this period, like heavy appliance use or a long term guest, may have raised your energy use.

This period, your energy use **increased** by

30%

Top recommended tip for you

Use LED holiday lights

Holiday lights can add charm to your home, but they also increase your electricity bill. If you're in the market for new holiday lights, invest in LED lights instead of inefficient incandescent bulbs.

Save up to \$45 per 100 bulbs per season

This tip can help you save and only requires a
