

Our Journey to Net-Zero

A look at PECO's Path to Clean, the progress we've made and where we're headed.

As a company, and in partnership with our customers and communities, we have made significant progress to achieve our Path to Clean goals. Take a look at what we have accomplished together so far.

200+

public charging ports available in the region

100+

electric vehicles in PECO's company fleet

128

legacy transmission circuit breakers replaced with more efficient models in 2022

34

EV fast charging sites installed across southeastern PA

1,500

customer EV registration rebates issued since 2021

50%

reduction in emissions associated with natural gas distribution since 2015

50+

EV fast charging sites planned in the coming years

14,000

solar customers supported across southeastern PA

50%

solar interconnection applications from 2021

11,600+

trees planted across the region in 2022

\$160,000

Green Region Grants awarded in 2022

\$200,000

invested with Pennsylvania Horticultural Society (PHS) in 2022

\$34 million

energy incentives awarded to customers in 2022

\$5.8 million

in energy efficient building upgrades for PECO facilities in 2022

Together, we are making a cleaner, brighter future a reality for the Greater Philadelphia region. We are excited about the progress that we have made on our Path to Clean and look forward to continuing on this journey.
